FITZGERALD'S WATER BASE COLOR COAT

This unique water based urethane polyester blend offers a tough, durable, natural feel and look for leather, vinyl, fabric, plastic and carpets.

- Outstanding abrasion properties and flexibility
- Excellent feel (compares with OEM)
- UV Resistant
- Thin viscosity, will not hide existing grain of leather or vinyl.
- Less dye build up on fabric and carpet fibers
- Water clean up
- Will not clog spray guns, air brush or Prevals
- Easy to use, one step color coating
- Base coat color with approximately 20% pigment
- As a clear topcoat for added durability
- Control gloss with Flat Ayde and Dulling Agent
- Air dry or low heat dry
- Apply by spray or wipe on
- Non-flammable

ADDITIVES

- Fitzgerald's Flat-Ayde - A self-adhering water base flattening agent for lo-gloss leather or vinyl finishes.
- Fitzgerald's Flex Agent - Add for a very soft, extremely flexible durable blend of color coat for leather were additional flex is needed..
- Fitzgerald's Sticky Primer Additive - A basecoat additive to improve adhesion to surfaces exposed to body oil.
- Fitzgerald's Plastic Coater Primer - A water based hard plastic clear primer, excellent adhesive for interior and exterior automotive plastics.
- Fitzgerald's Slip Agent - A water-borne slip agent/feel modifier for natural feel coatings. Gives a soft smooth feel.
- Fitzgerald's Crosslinker - Added to clear base or velour spray adhesive for a better durability.
